

## Disclaimer

The Computer system you will receive from the CACRC is a refurbished donated computer, monitor, keyboard and mouse. Each will be in working condition. If it is not, you have 60 days to bring it back. If we find that it is not working, we will exchange it for you. **THESE ARE NOT MATCHING SETS.** The monitor and computer as well as peripherals may be different models and colors. We cannot exchange computers based on model or color.

Your CLF computer is loaded with a very good antivirus program called Antivir. The first thing you should do when you connect to the internet is double click on the Antivir icon on your screen, and follow the instructions that appear. You will then be protected against most internet viruses. However, the best prevention against this type of problem is refraining from visiting dangerous sites, and care when opening email attachments.

When you surf the internet, you have to be careful. Thousands of websites are loaded with malicious software (called malware, spyware, etc), that can infect your hard drive and slow your computer dramatically, even stop it completely.

Most viruses are acquired when you visit "dangerous" websites (like the ones with pornographic content), or when you open email attachments that come from unknown people.

Please be aware that malware infection is not covered by our warranty. We cannot repair or replace your computer if it is infected by a virus.

We hope you enjoy your computer.
